

Instructional Learning Cycle

TeacherName(s):

Grade: Cycle: weeks Subject: ____Module: Week

End of Unit Assessment date:

Check for understanding dates:

Plan

Today's Date:

Cycle Date:

What do we want students to know and be able to do? What are 1-2 content standards that address this need?

Identify your Learning Targets:

What types of questions will you ask students to complete in order to assess the Learning Target(s)?

Consider how student responses will help you assess gaps in understanding and align instruction to the learning target(s).

Record the pre-test data on the Instructional Learning Cycle Data Collection Chart.

What evidence-based instructional strategies will support students learning the skills and content identified in your Learning Targets?

How will you teach these strategies?

Teach

What did you observe about student learning as you taught?

What revisions and adjustments to instruction were needed?

Record the post test data on the Instructional Learning Cycle Data Collection Chart.

Reflect

What did we learn about our strategies and/or instructional practices that may have contributed to student learning?

What strategies or instructional practices could address gaps in student learning?

What are our next steps? Are we ready to move on to a new area of focus? Or do we need to adjust our instructional plan and reteach?
