

The Basis Policy Research evaluation team is looking to conduct a series of CSI School Case Studies to understand **where**, **how**, and **why** particular supports are (or are not) assisting districts and schools in improving students' academic outcomes. This question will provide the MI Excel network with a better understanding of the types of resources and conditions that best position schools and districts to effectively implement school improvement reforms or initiatives. Case study participation will include a site visit from the Basis team, which will include interviews with ISD, district, and building personnel that support school improvement work.

We are hoping to leverage the insight and knowledge of ISD personnel to identify CSI schools who might be willing to participate. We encourage you to complete the brief survey if you work with a CSI that you (a) would like to highlight / showcase and (b) think they would be open to participating.
